47 U.S.C. § 223	9, 10

MEMORANDUM OF POINTS AND AUTHORITIES

I

INTRODUCTION

On December 15, 2008, defendant filed a motion for acquittal under Rule 29 of the Federal Rules of Criminal Procedure in effect claiming that the Court incorrectly instructed the jury on the meaning of the terms "unauthorized" and "in excess of authorization" because those terms, as a matter of law, could not be construed in reference to rules promulgated by the owners of those computers. Although defendant represented she would not be filing a reply, on January 2, 2009, defendant filed a reply raising a host of new arguments. Defendant now contends in her reply brief that her conviction should be overturned because (1) the Court's construction of "unauthorized" and "in excess of authorization" violates notions of due process because she had no notice that her conduct was criminal; and (2) the Court's construction of "unauthorized" and "in excess of authorization" were overbroad and would cause Section 1030(a)(2)(C) to encroach on First Amendment rights. Defendant instead contends the Court should have applied the rule of lenity when construing the statute. Defendant's new arguments are meritless.

First, defendant's due process challenge fails for the same reasons it failed pretrial. As explained previously, the statute's terms are plain. Those plain terms allow a prosecution of a defendant who lies to gain access to a computer and intentionally violates the rules established by a computer's owner for the use of that computer and accesses that computer for the purpose of committing another crime or tortious act. This

1 plain reading of the statute has been embraced by courts
2 throughout the United States. Accordingly, the statute gives
3 adequate notice of its scope. Indeed, the adequacy of the
4 statute's notice was borne out at trial: defendant and her co-
5 schemers discussed what they were doing was "illegal" and
6 defendant had to encourage them to continue.

7 Second, defendant's alleged First Amendment challenge fails
8 for the same reason it failed pretrial. Section 1030 does not
9 implicate any First Amendment rights. The statute does not
10 proscribe speech -- it proscribes conduct. But even if the
11 conduct the statute proscribes is tangentially related to speech,
12 that would not justify dismissal. Courts have repeatedly
13 recognized that there is no privilege to trespass in order to
14 exercise First Amendment rights.

15 Finally, defendant's appeal to the rule of lenity is of no
16 moment. The rule of lenity should only be applied if the other
17 canons of construction fail. Here, and as explained previously,
18 the plain language of the statute indicates that the Court's
19 instructions to the jury were proper. As a consequence, it would
20 have been inappropriate to rely on the rule of lenity when
21 formulating jury instructions.

22 II

23 ARGUMENT

24 A. APPLICATION OF SECTION 1030 IN THIS CASE DOES NOT VIOLATE
25 DUE PROCESS

26 In her reply brief, defendant again contends that the
27 application of Section 1030 to her conduct violates due process
28 because she lacked notice that her conduct was criminal. (Def's

1 Reply at 5-6). The Court should once again reject this argument.
2 Defendant had ample notice that Section 1030 covered her unlawful
3 conduct and, in any event, the evidence at trial establishes that
4 defendant actually knew that her conduct was criminal.

5 1. Defendant Had Ample Notice

6 The general rule in criminal prosecutions is that ignorance
7 of the law is no excuse. See United States v. Baker, 63 F.3d
8 1478, 1491 (9th Cir. 1995); see also United States v. Marsh, 894
9 F.2d 1035, 40-41 (9th Cir. 1990) (approving jury instruction that
10 "ignorance of the law is not defense" in controlled substance
11 conspiracy where jury sent note regarding whether the government
12 had to prove defendants knew manufacture of drug "euphoria" was
13 illegal). The Supreme Court has explained that a statute must
14 "define the criminal offense with sufficient definiteness that
15 ordinary people can understand what conduct is prohibited and in
16 a manner that does not encourage arbitrary and discriminatory
17 enforcement." Kolender v. Lawson, 461 U.S. 352, 357 (1983);
18 Gammoh v. City of La Habra, 395 F.3d 1114, 1119 (9th Cir. 2005).¹
19 In applying those standards, courts have emphasized that scienter
20 requirements establish the requisite minimal guidelines to
21 prevent arbitrary or discriminatory enforcement. See United
22 States v. Wyatt, 408 F.3d 1257, 1261 (9th Cir. 2005) ("The intent
23 requirement thus limits the discretion of law enforcement and
24 mitigates any perceived vagueness"); United States v. Panfil, 338
25 F.3d 1299, 1301 (11th Cir. 2003) (terms meanings were clear and

26
27 ¹ At least one court has rejected the argument that Section
28 1030 is vague in another context. See, e.g., United States v.
Fernandez, 1993 WL 88197 (S.D.N.Y. Mar. 25, 1993) (rejecting
argument that protected computer was unconstitutionally vague).

1 scienter requirement clarified meaning and protected against
2 arbitrary enforcement).

3 Here, the statute gave ample notice that it covered
4 defendant's conduct. As previously explained, the plain language
5 of the statute prohibits accessing a computer in violation of
6 rules set by the computer's owner. (See Government's Opp. at 4-
7 10). Moreover, scores of courts -- including multiple courts of
8 appeal -- have reiterated this principle. (See id.). To the
9 extent defendant is instead contending that the Court's
10 construction of the statute will lead to arbitrary or
11 discriminatory enforcement, defendant's argument still fails
12 given the statute's requirement that the government prove that
13 defendant intend to access computers without authorization or in
14 excess of authorization. See Village of Hoffman Estates v.
15 Flipside, Hoffman Estates, Inc., 455 U.S. 489, 499 (1982) ("[A]
16 scienter requirement [in a criminal statute] may mitigate a law's
17 vagueness, especially with respect to the adequacy of notice to
18 the complainant that his conduct is proscribed."); see also
19 United States v. Washam, 312 F.3d 926, 930 (8th Cir. 2002).
20 Section 1030(a)(2)(C) required that the government show that
21 defendant intentionally accessed the computers at issue without
22 authorization or in excess of authorization to impose liability.
23 As a consequence, the Court instructed the jury that the
24 government was required to show that defendant intentionally
25 accessed computers without authorization, and in excess of
26
27
28

1 authorization. The government did just that.²

2 Indeed, the evidence at trial demonstrated that defendant
3 not only intended to access computers without authorization and
4 in excess of authorization but that she knew that her conduct was
5 criminal. As the testimony of Ashley Grills established,
6 defendant and her co-schemers discussed how their conduct was
7 illegal:

8 Q: During the first week after you created the
9 account did anyone raise any concerns about what
you were doing?

10 A: Yes.

11 Q: And who was that?

12 A: It was both [S.D.] and I.

13 Q: And who did you raise those concerns with?
14

15 ² Defendant again seems to suggest that a person need to be
16 intimately familiar with written articulations of terms of
service to be culpable under Section 1030. (Def's Reply at 7
17 n.1.) Defendant is mistaken. As the government has pointed out
18 previously, the critical issue is not whether defendant was
intimately familiar with the written articulation of the rules,
19 but instead whether she intended to access protected computers at
issue without authorization or in excess of authorization. See
20 Lambert v. California, 355 U.S. 225, 228 (1957) (noting that the
"[t]he rule that 'ignorance of the law will not excuse' is deep
in our law") (quoting Shevlin-Carpenter Co. v.
21 Minnesota, 218 U.S. 57, 68 (1910)); see also Nash v. United
22 States, 229 U.S. 373, 377 (1913) ("[T]he law is full of instances
where a man's fate depends on his estimating rightly, that is, as
23 the jury subsequently estimates it, some matter of degree. If his
judgment is wrong, not only may he incur a fine or a short
imprisonment, as here; he may incur the penalty of death."). The
24 government satisfied its burden in a variety of ways, including
by showing that defendant was told her access was not authorized,
25 that defendant acted in a manner consistent with the requisite
scienter, and that defendant made statements showing she acted
26 with requisite scienter. Defendant's suggestion that defendants
need to be familiar with the written articulation of rules would
27 raise Section 1030's scienter requirement in an unprecedented
fashion beyond that found in securities, tax or other white
28 collar cases. Defendant's argument, therefore, should be
rejected.

1 A: Lori.

2 Q: And what did you tell the defendant?

3 A: That we thought we would get in trouble because
4 it's illegal to make a fake MySpace.

5 (Draft Grills Tr.) Defendant's notice argument, therefore,
6 fails. Ostrosky v. Alaska, 913 F.2d 590, 596 (9th Cir. 1990)
7 (due process challenge to statute for lack of notice failed
8 because defendant had actual knowledge of law).

9 2. The Court May Rely on the Substantial Circuit Authority
10 to Find that Unauthorized Has Its Plain Meaning

11 The crux of defendant's notice challenge nonetheless appears
12 to be that the Court cannot rely on cases applying the plain
13 meaning of Section 1030 in the civil context because this case is
14 a criminal matter. (Def's Reply at 5-6). Defendant's argument
15 is contrary to basic canons of construction. The Supreme Court
16 has repeatedly emphasized that where a statute has both civil and
17 criminal application, its terms must be applied consistently in
18 both the civil and criminal contexts. Marcus v. Hess, 317 U.S.
19 537, 542 (1943); ("This 'qui tam policy' cannot be used to
20 detract from the meaning of the language in the criminal section;
21 and we cannot say that the same substantive language has one
22 meaning if criminal prosecutions are brought by public officials
23 and quite a different meaning where the same language is invoked
24 by an informer."); United States v. Price, 383 U.S. 787 794-95
25 n.7 (1966) (applying same meaning to statute in criminal case
26 that it construed in civil context). This unremarkable principle
27 that a statute should be interpreted consistently, regardless of
28 whether the statute is applied in a civil or criminal case, has
been applied by Circuits throughout the country. United States

1 v. Nippon Paper Indust. Co., 109 F.3d 1 (1st Cir. 1997) ("The
2 words of Section One have not changed since the Hartford Fire
3 Court found that they clearly evince Congress' intent to apply
4 the Sherman Act extraterritorially in civil actions, and it would
5 be disingenuous for us to pretend that the words had lost their
6 clarity simply because this is a criminal proceeding."); United
7 States v. Brown, 79 F.3d 1550, 1559 (11th Cir. 1996) (meaning of
8 "scheme to defraud" does not change whether criminal or civil
9 RICO); Mattel v. United States, 624 F.2d 1076, 1080 (1980)
10 (same); Green v. Dumke, 480 F.2d 624, 628 (9th Cir. 1973).³

11 As a consequence, courts in criminal cases repeatedly rely
12 on civil authorities in a variety of contexts. See, e.g., United
13 States v. Smith, 454 F.3d 707, 716 (7th Cir. 2006) (applying rule
14 regarding evidence); United States v. Gewin, 471 F.3d 197, 202
15 (D.C. Cir. 2006) (same). For example, courts frequently look to
16 civil authorities in securities cases to address issues related
17 to loss. See, e.g., United States v. Rutkoske, 506 F.3d 170, 179
18 (2d Cir. 2007) (loss calculation). Courts even look to civil
19 cases in the criminal RICO context. Brown, 79 F.3d at 1559.
20 Defendant's suggestion that it is not "proper" to consider those
21 authorities is, simply, incorrect. (Def's Reply at 5). Indeed,
22 defendant's argument cannot be taken seriously as defendant

23
24 ³ Defendant's argument, taken to its logical conclusion,
25 would have nonsensical results. Defendant, after all, contends
26 that notwithstanding the plain language of the statute, her
27 conviction violated due process as only civil cases governed
28 application and construction of Section 1030. The implication of
defendant's argument would be that the first prosecution under
any statute would always result in a defendant lacking sufficient
constitutional notice because there would be insufficient
guidance on a new statute or in a new application of an old
statute.

1 herself has repeatedly asked this Court to apply a civil case,
2 Theofel v. Farey Jones, 359 F.3d 1066 (9th Cir. 2004), to this
3 criminal matter, and now asks the court to consider three
4 district court decisions to suggest that the Court erred when it
5 instructed the jury. (Def's Reply at 6.)⁴

6 B. APPLICATION OF SECTION 1030(a)(2)(C) TO DEFENDANT'S CONDUCT
7 DOES NOT IMPLICATE FIRST AMENDMENT CONSIDERATIONS

8 Defendant next contends the Court should have applied a
9 narrower construction of "unauthorized" to avoid First Amendment
10 considerations. (Def's Reply at 7-10). That argument fails for
11 the same reasons that it did pretrial.

12 1. No First Amendment Right Is Implicated

13 In effect, defendant simply assumes that the Court's
14 construction of Section 1030 would mean that a simple violation
15 of a website operator's terms of service alone would constitute a
16 violation of Section 1030. (Def's Reply at 6-10). As laid out
17 previously, a simple violation of the Terms of Service -- without
18 more -- would not constitute a violation of Section 1030(a)(2)
19 because other statutory elements must be met before the defendant
20 could be found guilty: specifically, a defendant must have
21 intentionally exceeded authorized access or intentionally

22
23 ⁴ Defendant's late citation to Condux International, Inc. v.
24 Haugum, 2008 WL 5244818 (D. Minn. Dec. 15, 2008); Black & Decker
25 Inc. v. Smith, 568 F. Supp.2d 929 (W.D. Tenn. 2008); and Lockheed
26 Martin Corp v. Speed, 2006 WL 2683058 (M.D. Fla. 2006), are
27 unavailing. As explained in greater depth in the government's
28 response to the Amicus brief, that line of cases, which at best
must be considered the minority view, is contrary to the plain
language of the statute, its legislative history and to cases
from this district. They do not, therefore, indicate that the
Court erred when it instructed the jury that "'access without
authorization' means to access a computer without the approval,
permission or sanction of the computer's owner."

1 accessed a computer without authorization, see, e.g., United
2 States v. Saban, 92 F.3d 865, 869 (9th Cir. 1996), the
3 defendant's purpose must have been to obtain information,
4 18 U.S.C. § 1030 (a)(2), and various jurisdictional and other
5 elements must be met.

6 Defendant's argument is particularly problematic because not
7 only does it read the scienter requirement out of the statute, it
8 ignores the fact that the statute prohibits the improper access
9 to a computer to obtain information -- not to disseminate it.
10 Consequently, while the core principle of defendant's argument
11 and the cases she cites is that individuals should be able to
12 disseminate information freely over the Internet, the Court's
13 instructions to the jury did not have the effect of criminalizing
14 speech. Subject to other laws, defendant was free to host her
15 own website to say whatever she wanted. Subject to 47 U.S.C.
16 § 223 and other authorities, defendant was free to make phone
17 calls or stand on a street corner using a pseudonym to proclaim
18 to the world what she felt. Defendant was even free to post
19 information anonymously on websites. What defendant was not free
20 to do, however, was to intentionally break the rules to gain
21 access to information not available to the public at large that
22 was kept on the protected computers of MySpace to further a
23 criminal or tortious purpose. Compare 18 U.S.C. § 1342
24 (prohibiting using "a fictitious, false or assumed title, name,
25 or address").⁵

26
27 ⁵ In this regard, defendant's citation of United States v.
28 Popa, 187 F.3d 672 (D.C. Cir. 1999), misses the mark because that
case addressed the criminalization of speech -- not the
unauthorized access of computers. The defendant in Popa had made

1 2. Courts Have Repeatedly Recognized that the First
2 Amendment Does Not Immunize Trespasses on Property
3 Belonging to Another

4 But even if First Amendment rights were implicated, the
5 tangential relationship to those rights would not be enough to
6 suggest that the Court's construction of Section 1030 was
7 improper. The degree of protection afforded to an interest
8 within the scope of the First Amendment depends in substantial
9 part upon the forum in which the activity is being pursued.
10 Acorn v. City of Phoenix, 798 F.2d 1260, 1264 (9th Cir. 1986);
11 Jews for Jesus, Inc. v. Board of Airport Commissioners, 785 F.2d
12 791, 793 (9th Cir. 1986). In the context of private property,
13 courts have held that "[t]he First Amendment is not a license to
14 trespass, to steal, or to intrude by electronic means into the
15 precincts of another's home or office." Dietemann v. Time, Inc.
16 449 F.2d 245, 249 (9th Cir. 1971); see also Food Lion, Inc. v.
17 Capital Cities/ABC Inc., 194 F.3d 505, 510 (4th Cir. 1999); Le
18 Mistral, Inc. v. CBS, 402 N.Y.S. 2d 815, 817 (App. Div. 1978)

19 _____
20 a series of abusive phone calls to the office of a political
21 appointee, then-United States Attorney Eric Holder, and was
22 subsequently charged with sending communications with "intent to
23 annoy, abuse, threaten, or harass any person." The Court of
24 Appeals reversed the defendant's conviction because it reasoned
25 the statute at issue, 47 U.S.C. § 223, unconstitutionally
26 burdened the defendant's speech when applied to his making racial
27 epithets and complaining about alleged assaults. The conduct at
28 issue in Popa therefore bore no resemblance to the conduct at
issue here. The defendant in Popa was charged for his harassing
communications - not illicitly accessing a computer, let alone
intentionally accessing a computer without authorization. But
even if he did intentionally access a computer without
authorization or in excess of authorization, he did not do so for
the purpose of obtaining information. He called Holder's office
to make statements. The conduct, therefore, would not satisfy a
single element of Section 1030. Popa, therefore, demonstrates
that the Court's instruction does not implicate First Amendment
rights.

1 ("the First Amendment is not a shibboleth before which all other
2 rights must succumb").

3 For example, the Supreme Court has explicitly stated that it
4 "has never held that a trespasser or an uninvited guest may
5 exercise general rights of free speech on property privately
6 owned and used nondiscriminatorily for private purposes only."
7 Lloyd v. Tanner, 407 U.S. 551, 568 (1972). In Lloyd, for example,
8 five young people had entered the mall of the shopping center and
9 distributed handbills protesting the ongoing American military
10 operations in Vietnam. Security guards told them to leave and so
11 they did, "to avoid arrest." Id. at 556. The trial court ruled
12 in favor of the plaintiff-protestors and the Ninth Circuit
13 affirmed, holding that the distribution of handbills on the
14 shopping center's property was protected by the First and
15 Fourteenth Amendments. Id. at 517. The Supreme Court reversed,
16 observing that the protestors "could have distributed the[]
17 handbills on any public street, on any public sidewalk, in any
18 public park, or in any public building." Id. at 564. The Court
19 emphasized that the Constitution "by no means requires . . . an
20 attenuated dedication of private property to public use." Id. at
21 569.

22 Defendant, after all, was not charged in connection with
23 operating her own communication service through which she
24 communicated with victim M.T.M. Instead, she and others obtained
25 access to MySpace's communication services under false pretenses
26 and by promising to refrain from certain conduct. Through that
27 fraud and false promise, defendant and her co-conspirators gained
28 access to MySpace's computers to carry out their scheme by

1 obtaining information from those computers which they were not
2 authorized to obtain. Accordingly, the issue is whether under
3 the banner of free expression, individuals may intentionally
4 violate the rules that govern the use of property belonging to
5 others. Under Lloyd, they plainly cannot. 407 U.S. at 568; see
6 also People v. Pulliam, 62 Cal.App.4th 1430, 1438-1439 (1998)
7 ("[c]riminal laws penalize conduct. If the conduct is
8 permissibly prohibited under the state and federal Constitutions,
9 the fact that the conduct may peripherally involve speech or
10 association does not cloak it with constitutional protections
11 that invalidate the criminal statute prohibiting the conduct.").⁶

12 II. DEFENDANT'S ARGUMENT REGARDING THE RULE OF LENITY IS
13 MERITLESS

14 Defendant instead suggests that the rule of lenity should
15 guide the construction of Section 1030(a)(2)(C). In doing so --
16 and without any authority -- defendant boldly states: "Given two
17 lines of cases, the court must adopt the narrower one in a
18 criminal prosecution." (Def's Reply at 7.) As explained
19 previously, binding authority is to the contrary. Lisbey v.
20 Gonzales, 420 F.3d 930, 933 (9th Cir. 2005); see also Pearson,
21 321 F.3d 790 (9th Cir. 2003) ("Lenity cannot be invoked merely
22 because a different reading of the statute is possible.").

23 ⁶ In light of the foregoing, to the extent defendant is
24 asking the Court to apply the constitutional avoidance doctrine,
25 it does not apply. First, "[t]he canon of constitutional
26 avoidance comes into play only when, after the application of
27 ordinary textual analysis, the statute is found to be susceptible
28 of more than one construction; and the canon functions as a means
of choosing between them." Clark v. Martinez, 543 U.S. 371, 385
(1997). Here, no ambiguity need be resolved. Second, and more
importantly, no constitutional issues are implicated through the
statute's construction. Accordingly, resort to the doctrine is
unnecessary.

1 The rule of lenity only provides that when a statute's
2 language is "grievously" ambiguous, the court should construe the
3 statute in favor of the accused. Chapman v. United States, 500
4 U.S. 453, 462-63 (1991). Because the rule of lenity only applies
5 when the language is ambiguous, the Ninth Circuit has rejected
6 requests to apply the rule of lenity upon concluding that the
7 statutory language at issue was clear. United States v. Banks,
8 514 F.3d 959 (9th Cir. 2008); United States v. Carr, 513 F.3d
9 1164 (9th Cir. 2008).

10 Here, the rule of lenity does not apply because the
11 statutory language is unambiguous. As explained previously,
12 accessing a computer in contravention of a website operator's
13 rules for that service is "unapproved," "not permitted," "not
14 sanctioned," and, therefore, "unauthorized." Alternatively,
15 access to "obtain . . . information in the computer that the
16 accesser is not entitled so to obtain" by definition exceeds
17 one's authorized access. 18 U.S.C. § 1030(e)(6). The fact that
18 some courts have differed in their interpretation of the meaning
19 of "unauthorized" is of no moment and does not justify a finding
20 of ambiguity. Lisbey, 420 F.3d at 933; see also Pearson, 321
21 F.3d at 790 ("Lenity cannot be invoked merely because a different
22 reading of the statute is possible."). And because the remaining
23 aids to construction likewise favor this plain reading of the
24 statute, reliance on the rule of lenity is inappropriate.
25 Lisbey, 420 F.3d at 933 ("We have declared statutes ambiguous and
26 applied the rule of lenity only when "a reasonable doubt
27 persists about a statute's intended scope even after resort to
28 the language and structure, legislative history, and motivating

1 policies of the statute.'") (quoting Moskal v. United States, 498
2 U.S. 103, 108 (1990)).

3 III

4 CONCLUSION

5 Accordingly, defendant's Rule 29 motion should be denied.

6 Dated: January 5, 2009

7 Respectfully submitted,

8 THOMAS P. O'BRIEN
United States Attorney

9 CHRISTINE C. EWELL
10 Assistant United States Attorney
11 Chief, Criminal Division
